

SUMANTH PASUPULETI

Connecticut, USA (Open to relocate) • +1 (203) 823-1550 • sumanthpasupuleti1@outlook.com

Data Engineer with around 3 years of experience skilled in Python, ETL processes, and Big Data tools like Spark. Expertise in designing end-to-end data pipelines, data extraction processes, and visualizations using SQL and Python. Skilled in building efficient ETL pipelines and creating interactive dashboards with Power BI and Tableau to support data-driven decisions.

EDUCATION

University Of New Haven

Jan 2023 - Dec 2024

Master of Science in Financial Analytics, GPA: 3.97

West Haven, CT Relevant

Coursework: Data Visualization, Data Analytics and Big Data, Business Analytics, Database Management, Analytical Applications in FinTech.

WORK EXPERIENCE

Apollo Technology Solutions LLC

Jan 2024 – Present

Data Engineer | *Microsoft SQL Server, Oracle SQL Server Integration Services SQL, T-SQL, Python, SSIS, Redgate SQL Toolbelt Microsoft Test Manager, JIRA, Linux Visual Studio, SSMS.*

- Conducting comprehensive analysis and categorization of data to streamline the migration process using SQL and Python.
- Built and automated Airflow pipelines to migrate data from Oracle and SQL Server to Snowflake on AWS S3, improving data accessibility and reporting efficiency.
- Conducted data cleansing and validation using SQL Server Data Tools (SSDT) and developed test plans to ensure successful migration and integration.
- Automated key ETL workflows using Python and Airflow DAGs, reducing manual intervention and ensuring timely data availability for business intelligence dashboards.

Briskwin IT Solutions

Dec 2021 – Nov 2022

Data Engineer | *Azure Data Lake, Azure SQL, Azure Databricks, ADF, Power BI, PySpark, Spark, Hive, Jira, Agile.*

- Worked on data migration and ETL processes using SQL, Azure Data Lake, and Azure Data Factory, ensuring efficient extraction, transformation, and loading of data from multiple sources.
- Designed and implemented cloud-based data pipelines in ADF and Databricks to automate data processing, improve performance, and enable seamless data integration.
- Developed analytical solutions to generate insights into customer acquisition, operational efficiency, and key business performance metrics by consolidating data from multiple structured and unstructured sources.
- Created Power BI reports by integrating data from on-premises and cloud sources, enabling real-time business intelligence and data-driven decision-making.
- Collaborated with cross-functional teams to resolve data flow issues and participated in Agile ceremonies, including Sprint planning and daily stand-ups.

Data Analyst | *Hadoop, MS Excel, SQL, Python, Tableau, Power BI, SSRS.*

May 2021 – Dec 2021

- Developed and optimized database objects, ETL processes, and real-time data pipelines using SQL, Hive, HBase, and Flume to process, store, and analyze structured and unstructured data.
- Built and published interactive dashboards and reports using Tableau and SSRS, leveraging Tableau Server for data sharing, scheduling, and performance insights.

PROJECTS

Rideshare Data Engineering and Analysis | *Azure ADLS, Databricks, Power BI, SQL, Python*

- Built a scalable data pipeline for rideshare data ingestion and transformation and developed interactive Power BI dashboards to visualize KPIs and insights.

A Relational Database for Digital Food Ordering | *SQL, Erdplus, RStudio, Tableau*

- Designed and implemented a relational database system with advanced data validation techniques to support transactional data accuracy, reducing processing errors by 25%.
- Created PLSQL queries for trend analysis and reporting, improving business decision-making efficiency by 20%

SKILLS

- **Cloud Technologies:** Azure, AWS S3, GCP
- **Big Data:** Hadoop, MapReduce, HDFS, Hive, Impala, Spark, Sqoop, HBase, Flume, Kafka, Oozie, Zookeeper, NiFi.
- **Code Repository Tools:** Git, GitHub, Bit Bucket.
- **Database:** MySQL, SQL Server Management Studio 18, MS Access, MySQL Workbench, Azure SQL, Azure Cosmos DB, Snowflake, Oracle.
- **End User Analytics:** Power BI, Tableau, Looker, QlikView.
- **NoSQL Databases:** HBase, Cassandra, MongoDB, Dynamo DB.
- **Programming Languages:** Python, SQL, PostgreSQL, PySpark, PL/SQL, UNIX Shell Script
- **ETL:** DBT, Matillion, Databricks, Airflow, Azure Data Factory
